**BACKGROUND**

Thirty-five years of experience in transportation, environmental, and renewable energy projects, with consistent focus on multimodal transportation projects. Background includes interdisciplinary work in the following areas:

- capital planning
- community outreach
- conceptual design
- construction management
- environmental permitting
- finance
- intergovernmental coordination
- law
- multi-modal transportation equity
- operations management
- public information
- transportation planning
- pedestrian and bicycle planning
- traffic management

**WORK EXPERIENCE**

2017-PRESENT

**CONSULTANT**

**BOSTON, MA**

Manage various studies and prepare reports related to highway and mass transportation projects. Work includes feasibility studies related Massachusetts Bay Transportation Authority (MBTA) operations and services, including advanced train control signals & other strategies to greatly improve capacity of Boston's two heavy rail subway lines and work related to the design and operation of new bus maintenance facilities to support new fleets of all battery electric buses. Work also includes the design, planning, engineering, and operations of the Massachusetts Department of Transportation (MassDOT) of I-90 (MassPike) Allston Multimodal Project. Studies include project conceptual design alternatives, traffic and transportation engineering, financial costs/benefits, and environmental permitting activities. Built partnerships with government officials, non-

governmental advocacy and other interest groups, neighborhood organizations and residents.

2011-2017

**SELF-EMPLOYED****BOSTON, MA**

Manage traffic management and transportation planning consulting practice. Business-space focus on large-scale transportation projects. Prepared studies related to major projects including MassDOT's Longfellow Bridge Reconstruction Project and I-90 Allston Interchange Reconstruction Project. Studies included project design and alternatives, traffic and transportation engineering, financial costs/benefits, and permitting activities. Built partnerships with government officials, non-governmental advocacy and other interest groups, neighborhood organizations and residents.

2005-2011

**BEAUFORT SOLUTIONS, LLC****BOSTON, MA**

**President and Founder.** Manage renewable energy development and consulting start-up business. Business-space focus on wind and solar photovoltaic utility-scale electric power projects. Successfully raised funds to pursue wind projects, and effectively consulted with clients to develop solar photovoltaic projects. Prepared corporate, property option, lease, easement, and other legal documents. Developed project financial analyses. Managed engineering and permitting activities. Built partnerships with government officials, interest groups, and community activists.

1999-2005

**MASSACHUSETTS TURNPIKE AUTHORITY****CENTRAL ARTERY/TUNNEL PROJECT****BOSTON, MA**

**Traffic Milestone Manager.** Member of Project Management Team responsible to effectively plan and successfully execute all major final-build traffic openings of this 15-year, \$15 billion transportation project including the new 3.6 mile Masspike (Interstate 90) extension between downtown Boston and Logan Airport and the 3.5 mile new underground Central Artery (Interstate 93) in downtown Boston.

- Manage the integrated planning and delivery of new multi-modal transport facilities designed to significantly improve how people and goods move around metropolitan Boston.

- Helped manage public information and media relations outreach efforts to ensure that traffic issues get communicated to road users, transit riders, elected and appointed government officials, key community and business interest groups, and the public in general.
- Provide strategic counsel to Project management, Boston region officials and business leaders, and construction engineers to help resolve complex conflicts between the needs of motorists, transit riders, bicyclists, and pedestrians, and the schedule and cost objectives of design engineers and construction contractors.

1993-1999

**MASSACHUSETTS HIGHWAY DEPARTMENT****CENTRAL ARTERY/TUNNEL PROJECT****BOSTON, MA**

**Traffic Manager.** Lead manager responsible for maintaining an efficient and effective transportation management strategy for the Boston region; proactively ensure minimal disruption to traffic flow; ensure coordination between different disciplines within the project and with various public and private entities; and present changes in traffic and transportation patterns to public and private stakeholders.

- Lead senior manager responsible to advocate that traffic, pedestrian, and transit flow receive the highest level of priority within an organization designing and constructing the world's most technically challenging and complex urban transportation program.
- Successfully managed the design, implementation, and community/media relations of approximately 1,000 routine and dozens of major roadway, sidewalk, and transit impacts and/or changes each year.

1987-1993

**MASSACHUSETTS HIGHWAY DEPARTMENT****CENTRAL ARTERY/TUNNEL PROJECT****BOSTON, MA**

**Deputy Manager, Environmental Mitigation Program.**

Helped to create and implement innovative programs, engineering methods, and construction techniques to

minimize construction impacts. Initiated the design and obtained federal funding for a Traffic Operations Center organized to monitor traffic flow and construction activities in Boston.
